### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Asquith on 5 September 2006.

The application has been amended as follows: amend claim 1 as follows:

In claim 1, delete element "[16]" which reads: "the electrolysis station has an electrolysis-station-inlet and an electrolysis-station-outlet, through which secondary water enters and leaves the electrolysis-station;".

In claim 26, delete element "[13]" which reads: "the electrolysis station has an electrolysis-station-inlet and an electrolysis-station-outlet, through which secondary water enters and leaves the electrolysis-station;".

In claim 27, line 3, delete "same" and replace with --the apparatus--.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: the closest prior art, Hiasa et al, teaches a single continuous recycle loop of secondary water. Absent the present specification, one of ordinary skill in the art would not have had any motivation to modify the apparatus of Hiasa et al to create two recycle loops of secondary water, where each loop included the intermediate tank, as is required by the present claims. Use claims 13 and 14 and method claim 27 are also allowable for at

least the reason that they require each and every feature of the allowed apparatus claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Additionally, since the claims in this application have been amended, the statutory double patenting rejection over the claims of 10/757,733 has been overcome. In view of the still pending status of that Application, an obviousness-type double patenting rejection could be made. However, as per MPEP 804.I.B.1., any outstanding provisional nonstatutory double patenting should be withdrawn in the earlier filed application upon the claims being otherwise found allowable. As such, any provisional double patenting rejection based on 10/757,733 is hereby withdrawn and the present application passed to issue.
